

High Voltage Constant Current Regulator

Description

The XR46014 is an 80V constant current regulator that can drive upto 250mA. Users may adjust the regulating current from 10mA to 250mA through an external resistor.

A linear type over temperature protection function protects the system by decrease the current linearly when the junction temperature of the chip is higher than 125°C. Multiple XR46014 chips can be connected in parallel to provide higher driving current capability.

The device is available in the SOT-223-3L package.

Typical Application

Figure 1. Typical Application

FEATURES

- 3V to 80V operation range
- 270mV low current sense voltage
- Linear over temperature protection
- Can be parallel connected for higher current

APPLICATIONS

- LED Lighting Applications
 - Downlight
 - High bay
 - Specialty
 - Architectural

Absolute Maximum Ratings

Stresses beyond the limits listed below may cause permanent damage to the device. Exposure to any Absolute Maximum Rating condition for extended periods may affect device reliability and lifetime.

Sustaining Voltage

IN -0.3V to 88V

CS -0.3V to 7V

Regulating current 300mA

Maximum operating junction temperature, T_J 165°C

Storage temperature range -55°C to 150°C

Lead temperature (soldering, 10 seconds) 260°C

ESD Rating (HBM - Human Body Model) 3kV

NOTE:

1. All voltages are with respect to Ground. Currents are positive into, negative out of the specified terminal.
2. All parameters having Min/Max specifications are guaranteed. Typical values are for reference purpose only.
3. Unless otherwise noted, all tests are pulsed tests at the specified temperature, therefore: $T_J = T_C = T_A$.

Operating Conditions

Regulating Current, $I_{IN}^{(4)}$ 250mA

Input Voltage, $V_{IN}^{(4)}$ 3V to 80V

Maximum Junction Temperature, T_J 150°C

Junction temperature range, T_J -40°C to 125°C

NOTE:

4. The maximum regulating current and the input voltage in above are only allowed in the applications which have suitable heat-sink area for the chip in PCB design. The maximum allowable power dissipation of the chip highly depends on the PCB design, PCB material, and ambient temperature. The chip may be damaged if the Junction Temperature is higher than 165°C.

The product (or products) mentioned in this data sheet are no longer being manufactured and may not be ordered (OBS)

Electrical Characteristics

Unless otherwise noted, typical values are at $T_A = 25^\circ\text{C}$.

Symbol	Parameter	Conditions	Min	Typ	Max	Units
V_{CS}	CS pin reference voltage	$V_{IN} = 5V$	0.26	0.27	0.28	V
V_{DROP}	Dropout voltage ⁽¹⁾	IN to GND		3.2	4.5	V
$\Delta V_{LR}/V_{CS}$	CS pin reference voltage line regulation ⁽²⁾	$V_{IN} = 5V$ and $40V$, $R_{CS} = 50\Omega$		± 1	± 2	%
T_{TP}	Thermal protection trip temperature ⁽³⁾⁽⁴⁾	When T_J is higher than T_{TP} , the V_{CS} decreases to $V_{CS,OTP}$ linearly	110	125		$^\circ\text{C}$
$V_{CS,OTP}$	Thermal protection mode CS pin reference voltage ⁽³⁾⁽⁴⁾	$T_J = 170^\circ\text{C}$		50		%

NOTES

- Dropout Voltage = V_{IN} at $90\% \times (V_{CS} \text{ at } V_{IN} = 5V)$
- The CS Pin Reference Voltage Line Regulation is defined as:

$$\Delta V_{LR}/V_{CS} = \frac{V_{CS}(V_{IN} = 40V) - V_{CS}(V_{IN} = 5V)}{V_{CS}(V_{IN} = 5V)}$$
- Guarantee by design, not by production test.
- When $T_J > T_{TP}$, the V_{CS} decreases linearly to around 50% at 170°C .

Pin Configuration

SOT-223, Top View

Pin Functions

Pin Number	Pin Name	Description
1	CS	Current sense pin. $I_{IN} = 0.27V/R_{CS}$.
2	GND	Chip ground pin.
3	IN	Power source and current input pin.

The product (or products) mentioned in this data sheet are no longer being manufactured and may not be ordered (OBS)

Characteristics Curves

Unless otherwise noted, typical values are at $T_A = 25^\circ\text{C}$.

Ordering Information⁽¹⁾

Part Number	Operating Temperature Range	Lead-Free	Package	Packaging Method
XR46014ISETR	-40°C ≤ T _J ≤ 125°C	Yes ⁽²⁾	SOT-223	Tape and Reel

NOTE:

1. Refer to www.exar.com/XR46014 for most up-to-date Ordering Information.
2. Visit www.exar.com for additional information on Environmental Rating.

Revision History

Revision	Date	Description
1.0	Jan 2015	Initial release.
1A	Nov 2016	New datasheet format, update Typical Application and add package drawing number to Package Description.
1B	Mar 2017	Add HBM ESD rating and clarify operating temperature range.
1C	May 2018	Update to MaxLinear logo. Update format and Ordering Information.

The product (or products) mentioned in this data sheet are no longer being manufactured and may not be ordered (OBS)
